

Calibration Certificate

Certificate Number

745AKREFB139370113

Kind of Equipment

Base Station Analyzer

This calibration certificate confirms that the measurements recorded in the applicable calibration report are within their specified limits and are specific to the unit with the serial number listed below.

Type / Model No.

JD745A

This unit was calibrated with direct comparison to a standard(s) required to calibrate this type of equipment.

Serial Number

EFB13937

The calibration results are traceable to the National Institute of Standards and Technology (NIST) which are consistent with the recommendations of the General Conference on Weights and Measures (CGPM), or to standards derived from natural constants, or to standards relying on ratio measurements with self-calibrating technique for their calibration. If a National Standard is not available, the result is traceable to the Reference Standard of Viavi Solutions.

Manufacturer

VIAVI Solutions

Calibration Date

13-Jan-2021

The calibration has been carried out within a certified quality system according to ISO 9001. The metrological confirmation system of measuring equipment complies with ISO 10012-1.

Confirmation Interval

12 Months

The stated confirmation interval shall be regarded as a recommendation. The real definition of the confirmation interval should be made by the user. The type of application and the environmental conditions should be taken into account.

Calibration Due Date

12-Jan-2022

Ambient Temperature /
Relative Humidity

(26)°C / (20 ... 80)%
